EDUCATION

R.V.R & J.C College of Engineering — B.Tech, Data Science

Aug 2023 – Present | CGPA: 9.45/10

K.S.K Girls Jr. College — 12th (MPC)

Oct 2022 | 89.6%

Z.P. Girls High School — 10th (SSC)

Oct 2020 | 100%

SKILLS

Languages: Python, Java, C **Web:** HTML, CSS, JavaScript, React **Databases:** MySQL, MongoDB

ML / Data Science: Pandas, NumPy, Scikit-learn, NLP, Data Preprocessing **Cloud & Tools:** AWS, Oracle OCI, Flask, REST APIs, Git, GitHub, Power BI

PROJECTS

Cloud Intrusion Detection System (Cloud IDS)

GitHub Repo

Tech Stack: Python, Scikit-learn, Flask, Cybersecurity, Data Analysis

- Built ML-based IDS using Random Forest and SVM classifiers to detect malicious cloud network traffic in real time; achieved 94%+ accuracy across DDoS and port-scanning attack categories.
- Applied feature engineering and threshold tuning to reduce false-positive alert rate by 30%, improving security analyst response efficiency.

Exam Feedback Classification System

GitHub Repo

Tech Stack: Python, Machine Learning, NLP, Scikit-learn

- Built TF-IDF + SVM pipeline on 1,000+ labeled samples to auto-categorize student feedback by difficulty, clarity, and pacing; achieved 88% accuracy against Logistic Regression and Naive Bayes baselines.
- Automated end-to-end feedback analysis, cutting manual review effort by ~70% and enabling faster curriculum improvement cycles.

Online Banking System

GitHub Repo

Tech Stack: Python, OOP, Modular Design

- Built console-based banking system in Python with OOP architecture — account creation, deposits, withdrawals, and transaction history with clean modular design.
- Applied encapsulation and separation of concerns, producing a maintainable codebase handling multiple account types without code duplication.

INTERNSHIPS

AI Virtual Intern — Infosys Springboard

Nov 2025 – Jan 2026

- Completed 10+ structured AI modules; built and validated end-to-end ML pipelines covering data preprocessing, feature selection, model training, and evaluation on real-world datasets.
- Explored responsible AI practices and ethical development frameworks across diverse industry use cases.

Web Development Intern — Brainwave Matrix Solutions (Remote)

Jul – Aug 2025

- Built responsive Day Planner app (HTML/CSS/JS + Local Storage) and e-commerce prototype with dynamic product listings and cart, demonstrating full frontend lifecycle ownership.

Python Programming Intern — Vaishnav Technologies (Virtual)

Jan – Feb 2025

- Built console-based Online Banking System in Python with OOP architecture supporting account creation, deposits, withdrawals, and transaction history with clean modular design.

CERTIFICATIONS

- OCI 2025 Certified Generative AI Professional, Data Science Professional & AI Foundations Associate — Oracle
- AWS Academy Cloud Foundations | AWS Generative AI Foundations — AWS
- Data Analytics Job Simulation — Deloitte | AI Fundamentals — IBM | Use AI in Everyday Tasks — Microsoft

ACHIEVEMENTS

- Ranked Top 11 in department (CGPA 9.45/10) at R.V.R & J.C College of Engineering.
- Topper in Introduction to IoT — NPTEL | Perfect 100% score in 10th SSC Board Examination.
